

**LONGER LASTING  
& EASIER TO HANDLE**  
SHARES STRESS 6X STRONGER

▼ *the future of lath*

## OVERVIEW

SpiderLath is a superior fiberglass lath system for use in stucco, plaster, tile, countertops, shower surrounds, manufactured stone, natural stone veneers, brick, concrete stairs, concrete overlays and other masonry systems. SpiderLath can be used over existing surfaces to apply masonry finishes and is fully encapsulated in the mortar bed creating a fiberglass reinforced scratch coat.

**“It solves a difficult problem in a very elegant way.”**

-Michael, Chandler Design Build

### ▼ Spiderlath testing

The ICC-ES AC 275 is the benchmark “Acceptance Criteria for Glass Fiber Lath Used in Cementitious Exterior Wall Coatings or Exterior Cement Plaster”. SpiderLath has equalled or exceeded each of the tests required in the ICC-ES AC 275 and has received the appropriate Evaluation Report from IAPMO, accredited by the American National Standards Institute (ANSI).

For complete testing results and technical information, please visit our website at [www.spiderlath.com/test](http://www.spiderlath.com/test).

IAPMO Evaluation #0141

## FLOOR OVERLAY

Concrete overlays are becoming an increasingly popular choice for architects, designers, and homeowners. It can be styled and colored to match any décor, making sure your overlay lasts a lifetime with SpiderLath.

## THE BEST CHOICE FOR VERTICLE CARVINGS, SCULPTURES & MUCH MORE!

**S**piderLath was created by masons, for masons, to meet and exceed all ASTM 1063C code requirements for lathing. The Lath is made from fiberglass, eliminating corrosion and protecting your customer's investment for a guaranteed 50 years. Unlike traditional metal lath, SpiderLath bonds with the cementitious material, increasing the strength of masonry material 6 times over. SpiderLath ensures the best possible installation of **stone veneer, stucco, vertical carvings, floor overlays, sculptures and more.**
